August 25, 2005 **Collaborators/support for Wete Social Amenities Project (WESAP) still needed!**

Wete is one of the most beautiful islands in Tanzania with clove plants and fishing as its main economic activities. Wete town is administratively the regional head quarters of the Northern Region of Pemba. After identifying the shortcomings facing their socio-cultural and economic development, the Wete Regional Administration and the people of Wete created the District Development Committee to curb the problem. These efforts carry the name *WETE SOCIAL AMENITIES PROJECT (WESAP)*. Through education, library learning, functional hospital, sports and games, cultural art performance, cooperative gatherings and income-generating projects, there exists an obvious ground for individual and collective advancement at the economic, healthy and the socio-cultural level. Such advancement, knowledge and experience can also be learned and acquired through global engagement in form of international exchange, support and collaboration.

As an Overseas Coordinator for *WESAP*, we kindly approach you for the purpose of initiating and linking future collaboration between your organisation/community and Wete town through Wete Development Committee. Please contact SSHC (Overseas Coordinators) for further information. We thank you in advance!
